Education

University of Wisconsin-Madison

Graduated Spring 2026

Economics, B.S. - Honors | Mathematics Second Major, Data Science Minor

GPA: 3.85

- Relevant Coursework: Graduate Microeconomic Theory 1 & 2, Graduate Econometrics 1, Analysis I & II, Measure Theory, Linear Optimization, Stochastic Processes

Honors & Awards

- NASA-OSTEM Intern
- NOAA Internship
- UW-Madison Sophomore Research Fellowship

Research & Data Analysis Experience

Microsoft Research

Boston, MA

Predoctoral Research Fellow – Economics and Computation Group

July 2026 – July 2028

- Conducting research on market design and agentic AI.

National Economic Research Associates

New York, NY

Summer Analyst – Antitrust Practice

June 2025 – August 2025

- Built a dataset of 1,000+ third-party sites for a major oilfield supply merger using Python, survey data, and manual research; collaborated with 5 analysts to ensure accuracy for antitrust review.
- Developed 40+ Python/Pandas geospatial maps illustrating changes in HHI for individual sites and surrounding markets, supporting competitive impact analysis in merger review.

Senior Thesis, University of Wisconsin – Madison

Madison, WI

Senior Honors Thesis under Professor Lones Smith

May 2025 - Present

- Constructing empirical component of Lones Smith's *Aspirational Bargaining* project using Matthew Backus's eBay Best-Offer data.
- Processed and analyzed large-scale negotiation data using Polars; estimated regression models linking bargaining delays to concessions.

US Department of Treasury – Office of Economic Policy

Washington, DC

Fall 2024 Intern

September 2024 – December 2024

- Supported Treasury Economists on U.S. economic policy research projects via data analysis and report writing.
- Conducted 15 different literature reviews, each synthesizing ~15 papers across macroeconomic, microeconomic, and finance topics.

Research Assistant, Finance Department, University of Wisconsin – Madison

Madison, WI

Collaborative Research under Professor Erwan Quintin

January 2025 – May 2025

- Built a custom GPT-based AI model to extract 8 key parameters—including bid values and qualitative indicators—from over 200 ransomware negotiation transcripts.

Wisconsin Center for Educational Research, University of Wisconsin – Madison

Madison, WI

CALL-ECL, Research Assistant

July 2024 – January 2025

- Cleaned data using R and create standardization of survey responses into square matrices for 17 different questions from hundreds of survey respondents.

Pacific Economics Group Research LLC

Madison, WI

Intern – Utility Rate Making

July 2024 – August 2024, January – May 2025

- Managed migration of large FERC Form 1 database using SQL, Python, and Excel to easily accessible CSV files.
- Used QGIS software to create a province-wide measure of percent forestation for all of Ontario's electric utility companies.

Department of Applied & Agricultural Economics, University of Wisconsin – Madison

Madison, WI

Sophomore Research Fellowship, Professor Andrew Stevens

January 2024 – April 2025

- Led a research project in collaboration with the Westosha Senior Center to analyze the return on investment for agricultural produce using an SQL database.
- Performed regressions, elasticity calculations, and econometric analyses using Python, Stata, and R.
